RESOLUTION TO REDUCE GRADUATE STUDENT FEES
TO: PRESIDENT ÁNGEL CABRERA
FROM: GT ACADEMIC FACULTY SENATE
for review and vote on October 22, 2019

Whereas, current Georgia Tech graduate student fees are far above peer institutions; GT is the only public institution from Georgia represented in the American Association of Universities (AAU) [1]; We estimate that Georgia Tech had the highest mandatory fees of any AAU institution in 2018-2019 [2], totaling $2,776 per year;

Whereas, graduate students are at the core of GT efforts to ‘create the next’; strategic investment in recruitment and retention of future engineers, scientists, and entrepreneurs offers a significant return on investment to fuel discovery, innovation, growth, and new jobs in Georgia;

Whereas, talent need not start rich; substantial graduate fees are paid after-tax and out-of-pocket by graduate students from modest stipends. Graduate SGA analysis reveals that students typically pay in excess of 45%-60% (or more) of wages to rent, far above the 30% threshold for Housing and Urban Development Guidelines for rental assistance [3]; Georgia Tech’s efforts to fully realize Bloomberg Philanthropies’ ‘American Talent Initiative’ [4] requires investment in the next generation of undergraduates and graduate students across the spectrum of economic levels;

Whereas, annual budgets should not be borne on special institutional and athletic fees paid by graduate students; Total mandatory fees of $2,776/yr in FY 2019 (which increased slightly in FY 2020) include a special institutional fee of $1,032/yr and athletic fees of $296/yr. Neither core operating costs nor support of Division I athletics (for which graduate students are almost entirely ineligible) should be borne by graduate students [5,6];

Whereas, financial stress negatively impacts graduate student productivity; Economic hardship significantly reduces the ability of students to realize their full potential and detracts from the core mission of graduate research assistantship and graduate teaching assistantship support;

Whereas, a graduate fee reduction initiative would demonstrate institutional values through action-taking and will send a clear signal: GT is committed to a sustained ascendancy among leading American universities; now therefore be it

Resolved, that the Academic Faculty Senate of the Georgia Institute of Technology, on behalf of the academic faculty of the Georgia Institute of Technology:

1. Requests that Pres. Cabrera work with the University System of Georgia Chancellor and the Chair of the Board of Regents to reduce the special institutional fee charged to full-time graduate students at Georgia Tech from $344/term (in FY20) to $172/term (in FY21) to $0 (in FY22); this is equivalent to a $1,032 reduction per student annually.

2. Requests that Pres. Cabrera work with the Faculty Executive Board, Georgia Tech Budget Office, and the Georgia Tech Graduate Student Government Association to eliminate the athletic fee charged to full-time graduate students (from $296/yr in FY20 to $0 in FY21).

3. Requests a moratorium on increases to all other graduate student fees, pending an institute-wide re-evaluation of graduate assistantship stipends, mandatory fees charged to graduate students, graduate tuition costs, and availability of affordable graduate housing.
